

Seaflex Quality Policy

Purpose

This policy aims to describe how we at Seaflex want to achieve high quality in our products and services, and in relations with our stakeholders internally and externally.

Description

Seaflex creates sustainable solutions in the marine world. Based on our values and our overall business goals, we develop our business, our employees and what we offer our customers. Together we create opportunities for a better world in the marine environment.

Seaflex takes great responsibility for the quality of our products and services. We work preventively and long-term with quality as an integrated part of our daily operations. Our ambition is to be at the forefront of developing the products and services we deliver.

Our vision is to become a global standard for mooring systems. Our overall goal is to be a profitable business with satisfied customers, as well as employees, with quality, work environment and environment in the center.

We work to make every project, from inquiry to installation and inspection, a good reference for future collaborations. We put the customer in focus and help them to clarify the needs from the very beginning. Through a close dialog with the customer, we work to meet needs and expectations throughout our collaboration.

We want to achieve quality in our products and services by:

- Meeting our customers' requirements, needs and expectations.
- Being perceived as a reliable and committed partner/supplier.
- Commitment, understanding and good internal cooperation.
- To benefit from the great experience and competence we have internally.

To achieve good quality in our products and services and achieve our quality goals, we will:

- Work with continuous improvement.
- Prioritize preventive measures.
- Continuously train and develop the competence of our staff.
- Systematically monitor and evaluate our routines and processes.
- Keep us updated and comply with laws and regulations that our business is affected by.
